The MAILING DATE of this communication appears on the cover sheet with the correspondence address									
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. It the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in-
- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1 and 3-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Riggs, et al.-5186166.

Riggs discloses a nebulizer having a metering pocket 48 holding powder 72. A jet 66,68 introduces a gas stream from source 44 into the pocket thus nebulizing the powdered medication. The medicated aerosol is delivered to a patient via a mouthpiece which could be the claimed mixing chamber, or the chamber could be merely pipe 21.

Claims 1,3-7 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Gerde-6003512.

Gerde discloses an aerosol generator having a pocket 12 holding powdered medication, a source of gas attached to chamber 14 for providing a jet of gas through

Application/Control Number: 09/966,562

Art Unit: 3761

conduit 18 into the pocket to aerosolize the powder which expands in a mixing chamber 22 into a breathable form which is pushed via a plunger 38 out conduit 36.

Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by Hammarlund-5711292.

Hammarlund discloses a aerosolizing device having a pocket-bottom of 1, a mixing chamber- top of 1, a gas source attached to tube 3 for aerosolizing the liquid medication solution of an active ingredient and a solvent into a breathable mist.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gerde-'512. Application/Control Number: 09/966,562

Art Unit: 3761

Gerde discloses the invention as claimed with the exception of the size of the pocket. To have made the pocket of Gerde in the claimed size would have been merely an obvious alternative design choice known to one skilled in the art as it was known that under certain conditions extremely small doses are necessary and therefore the size of the pocket holding these small doses could indeed be made within the claimed size range.

Allowable Subject Matter

Claims 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn K Dawson whose telephone number is 703-308-4304. The examiner can normally be reached on M-Th 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Weilun Lo can be reached on 703-308-1957. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-3590 for regular communications and 703-306-4520 for After Final communications.

Application/Control Number: 09/966,562

Art Unit: 3761

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0858.
